

IF YOU HAVE A PASSION
FOR FLYING
THERE IS NO BETTER PLACE
TO LAND

Pilot Training

Wings Aviation Pvt limited

If you have a passion for flying there is no better place to land than Wings Aviation Pvt limited. We offer nation's most rigorous training programs in the fields of aviation and aerospace. Established in 1995, Wings Aviation Pvt limited is India's premier flight training institute offering DGCA approved fully integrated courses. Our training programs are renowned for their consistency and relevance to the fast changing demands of the aviation industry. We have trained students from India and around the world and helped them achieve their dreams of becoming a pilot. We maintain the highest standards of safety and excellence in pilot training needed to prepare students for a challenging and exciting career in aviation. We offer courses for Commercial Pilots License, Private Pilot License, Instrument Rating and Multi Engine Rating. We also offer the Airbus A-320 Course in association with Advanced Aircraft Training Institute, UK, available at very few academies.

Wings Aviation Pvt limited has contributed in setting high standards of aviation training in India. We've created a training environment that boasts state-of-the-art technology, high-quality training, a global reach and a culture of service excellence. With a large fleet of 10 Single and Multi engine training aircraft, training base at an airport dedicated for flight training, exclusive training

airfield, IT enabled Ground School, an advanced simulator, a large hangar, and Industry experts as instructors, we continuously offer a practical and operational learning experience through new and innovative technology. We have teamed up with many airlines to provide customer-driven training solutions for every segment of aviation. Our students graduate career-ready with a strong academic foundation and the most comprehensive training available. Our students are now holding enviable positions in premier aviation organizations in India and abroad.

Wings Aviation is also a full-service, global Maintenance, Repair & Overhaul (MRO) provider with the expertise to offer the best possible service available today in commercial aviation. We also operate an advanced AME (Aircraft Maintenance Engineering) School offering advanced courses that cover the complete gamut of MRO services.

Our Mission

" To provide our students with a strong educational foundation and equip them with skill sets and attitude that helps them achieve overall success in their career. Inculcating in them civic and professional values, we seek to produce a new breed of super aviation professionals to competently serve the aviation industry worldwide."

Why WINGS

- 15 years of successful pilot training experience
- Amongst the few privileged 'Cessna Pilot Centers' in the world
- Large fleet of 10 Single and Multi-engine world-renowned Cessna aircraft for training
- A host of world-class training facilities and resources
- Expert Faculty considered among the best in the Industry
- An Impeccable First class Safety Record
- ISO 9001:2008 Certified Pilot Training Academy
- An effective students: Instructor: aircraft ratio to ensure availability of maximum training time for each student
- Training base on airport exclusive for flight training with no obstructing traffic, and close to civil and military aerodromes
- Continuous presence of flight and technical ground trainers onsite
- Strategically located in Hyderabad, India offering very good connectivity with national and international destinations
- Excellent weather and visibility record that ensures round-the-year flight training
- Access to world-class International Airport

Courses Offered

Our accelerated, structured courses prepare students for the real world of professional flight, ensuring safe, skilled and professional flight operations. Whether you want to build a career in aviation or just fly for fun, we have a range of courses offering you the right choices for your training requirements.

We bring you the finest pilot training available using our comprehensive DGCA approved syllabus, rigorous ground and flight instruction with the most advanced training facilities.

Commercial Pilot Licence Course :

This course requires 200 hours of flying. An 18 months course that covers in-depth study of aerodynamics, weight and balance control, advanced aircraft systems, aviation regulations, maneuvers and high performance aircraft training.

A commercial pilot license holder can become a captain of a single / multi engine aircraft. The license issued is valid internationally and the students are eligible for working in any aviation organisation. They may also work as an officer

under Ministry of Civil Aviation, or become a flight instructor and have a host of career opportunities.

Private Pilot Licence Course:

The 3 to 6 months course gives you 60 hours of flying time. After completion of this program, it enables a person to become a licensed pilot in command of a single engine aircraft carrying passengers or cargo. This course is ideally suited for aviation enthusiasts and hobby fliers who may wish to rent an aircraft and fly, and for those who own a personal aircraft.

Instrument Rating Course:

This course includes instrument navigation, instrument cross-country flight and instrument emergency procedures. It provides training for flying on instruments, meteorological conditions and in the clouds. It gives pilot precision flying skills in an increasingly complex air traffic system.

Multi Engine Rating Course:

The course covers aerodynamics, systems, and procedures focusing on increasing the safety and proficiency levels of pilots. The students are given Type Rating (TR) and Instrument Rating (IR) on a twin engine aircraft. The course curriculum covers airline oriented training in which they learn to fly the airway routes (like the airlines fly), doing instrument approaches and handling simulated emergencies like engine and other system failures.

World-Class Training Facilities

The academy has excellent infrastructure for imparting specialized training in the field of aviation. We are one of the largest aviation academies in the Country with a fleet of world-renowned Cessna 152, C-172 and glass cockpit Cessna 172 aircraft. We also have Twin Engine P-68 C aircraft. All aircraft are equipped with Global Positioning Satellite systems and instrument landing aids. We deploy advanced simulation technology through the use of computer based training tools, flight training devices and highly advanced full-flight simulator.

The Academy also boasts an exclusive airfield dedicated for training, an advanced hangar built to meet global standards, availability of old Hyderabad Airport for practical training, flight training, and maintenance of aircraft. The other resources include classrooms accessorised with multi-media training aids, well-stocked library, canteen, conference hall and a well-furnished hostel. Our library has a vast collection of aviation books, training manuals, ICAO Annexure, magazines, periodicals and DVDs. We also have charter flight and cargo operations. We have the right set of facilities and tools required to give you a professional advantage and your career a flying start.

Our Team

To be able to deliver the best in flight training, we have a team consisting of experts in their respective fields. The vast experience of our high caliber management, teaching faculty and support staff has continuously contributed to our pedigree and record of achievement.

The ground and flight training instructors at Wings are highly qualified and among the best in the Aviation Industry. Our instructors have extensive flying and training experience of many decades with global exposure. To support our training teams we have support staff to ensure that training progress, reporting, testing as well as non-training matters are well managed.

Alumni & Placements

The Academy has an accomplished alumni base across several regional and international airlines like Kingfisher, Emirates, Jet Airways, and Air Arabia to name a few. We have a good placement record. Around 500 of our student who pass out as pilots from our Academy are working with leading airlines around the world today.

GIVING WINGS TO PILOTS FOR MORE THAN A DECADE
